Address: 86, Temkar Street, 3rd Floor, R.no: 8, Nagpada,
Mumbai: 40008

SUMMARY

Possessing 6.5 years of vast experience in the field of Netscaler, Citrix XenApp, VMware, Windows (All Flavours), RHEL (All Flavours) where Planning, Implementation, and troubleshooting are involved with multiple platforms

CORE COMPETENCIES

- Technically competent, motivated and an independent thinker.
- Armed with various professional certifications and a technical degree, can provide the impetus required by any organization in meeting core business objectives.
- Possess strong analytical and problem-solving skills, with the ability to make well thought out decisions.
- Confident, articulate, and professional speaking abilities.
- Quick learner

TECHNICAL PROFICIENCY

Virtualization

- VMware : vSphere Suite
- Microsoft : Hyper-V

End User Computing

- Horizon View
- App Volumes
- UAG
- DEM

Storage Concepts & Hands-on

- Fibre Channel
- iSCSI / SAN
- NFS
- vSAN

Operating Systems

- Microsoft : Server OS (2008, 2012, 2016,2019) Windows XP, 7, 10 OS
- Linux : RHEL, Ubuntu and CentOS

WORK EXPERIENCE

- Tata Consultancy Services Pvt Ltd
October 2021 - Present
- Capgemini India Pvt Ltd
May 2020 – September 2021
- Orange Business Services Pvt Ltd
February 2019 – April 2020
- Dimension Data India Pvt Ltd
Nov 2017 – January 2019

WORK DETAILS

Working with Tata Consultancy service as Technical Lead since October 2021 till Now

Key Roles

- Installation, Manage & Configuration of VMware vSphere 7.
- Installation, Manage & Configuration of VMware Vcenter 7.
- Installation, Manage & Configuration of VMware Horizon 8 component such as Connection servers, Horizon Agent, App volume, Dynamic environment manager etc.
- Installation, Manage & Configuration of VMware Workspace One Appliance and VMware Workspace One connector for Access control.
- Upgradation and updating of all the VMware component for meeting the compliance requirement.
- Monitoring all the license component and update same if required.
- Basic knowledge of Nutanix such as Prism, Controller and CVM servers.
- Floating profile from file server to all the RDSH server in the environment.
- Knowledge of MFA use in workspace one through Credentiax where YGO application is use.
- Installation, Manage & Configuration of all type of Windows flavours such as Windows 2012, 2008, 2016, 2003 & 2019.

Working with Capgemini as Associate Consultant since May'2020 till Sep 2021

Key Roles

- Installation, Manage & Configuration of Netscaler 13.1.
- Managing overall infrastructure of Citrix XenApps 7.15 on VMware platform.
- Handling all the user level issue in Citrix Environment.
- Handling all the datacentre related issue.
- Installation, Manage & Configuration of VMware vSphere 6.7 (Vcenter).
- Installation, Manage & Configuration of Hardware UCS & HP.
- Installation, Manage & Configuration of all type of Windows flavours such as Windows 2012, 2008, 2016, 2003 & 2019.
- Installation, Manage & Configuration of all type on RHEL server All Flavours.
- Installation, Manage & Configuration of vSphere, Vrops & vRLI
- Installation & managed of Data Domain & HP3par storage.
- Installation, Manage & Configuration of VSAN.
- Installation, Manage & Configuration of SRM (Site Recovery Manager).
- Basic knowledge of Nutanix.

Working with Orange Business Services as Technical Consultant since Feb'2019 till May'2020
Key Roles

- Installation, Manage & Configuration of VMware vSphere 6.7
- Installation, Manage & Configuration of Hardware UCS (Unified Cisco System).
- Installation, Manage & Configuration of SRM (Site Recovery Manager).
- Installation, Manage & Configuration of all type of Windows flavours such as Windows 2012, 2008, 2016, 2003.
- Installation, Manage & Configuration of all type on RHEL server.
- Installation, Manage & Configuration of vSphere, Vrops & vRLI
- Installation & managed of Data Domain & HP3par storage.
- Installation, Manage & Configuration of VSAN.
- Basic knowledge of Nutanix.

Worked with Dimension Data as Monitoring Engineer since Feb'17 till Feb'19
Key Roles

- Installation of ESXi on Cisco blade server.
- Upgrading patches on Cisco blade server.
- Upgrading firmware on UCS IO module such as chassis, Fabric interconnect, Blade server & Rack server.
- Managing all the component of UCS.
- Overall connection of fabric interconnects.
- Configuration & Managed Recovery point for VM.
- Failover and Failback of all VM from DC to DR.
- Installation Avamar server and integrate it with Data domain.
- Installation Linux SUSI on Avamar node.
- Installation Avamar server and integrate it with Vcenter.
- Working on Cisco UCS Blade Server & installation of ESXi on server through UCS Manager.
- Working on V-Block 540 Technology monitoring V-Block through UCS Manager.
- Basic Knowledge of Managing Trend Micro and Symantec Anti-Virus and Crating Report.
- Monitoring a VSphere, VM Horizon Administration and VROPS, NSX, EMC multiple product.

- Checking Vcenter alerts and adding new virtual machine and running DRS.
- Working on scripting tools such as filename.bat, power shell, power CLI etc.
- Creating VM machine through VRA & VRO.

Techincal Details:

Horizon View:

- Deliver white board sessions and tech talks for team and for customers
- Aiding customer in setting up complex Horizon environments
- Assisting customer with deployment best practice for Horizon/ AppVolumes and DEM
- Troubleshooting critical issues reported by critical customer/ PSO or field team
- SPOC for multiple critical account in AMER region
- Working with KX (documentation team) to find gaps in documentation and taking necessary actions so to deflect SRs
- Performed QE testing for upcoming Horizon builds

VMware vSphere:

- Worked environment with vSphere version 5.1 to 6.5
- Resource Management on ESXi servers
- Adding the ESXi Servers in Virtual Center.
- Creating Microsoft Cluster on VMs with 2003, 2008 and 2012 OS.
- Command line troubleshooting for ESXi Hosts / Virtual Machines
- Troubleshooting Virtual Machine related issues like performance, snapshot issues, network issues etc.
- Installing patches, upgrading ESXi servers.
- Presenting storage on ESXi servers and getting it recognized on ESXi hosts.
- Configuring and troubleshooting HA and DRS issues, applying VM-Host affinity rules.
- Creating dvPort Group on a vNetwork Distributed Switch.
- Configuring and troubleshooting networking on ESXi servers.

Windows

- Commissioning Windows servers which include installing OS, bring server on network, installing latest patches and monitoring tool etc.
- Worked on clusters and cluster related issues.
- Creating and troubleshooting websites.
- Installing/renewing internal (ERCA) and external (Thawte) certificates on websites
- Troubleshooting OS related issues like blue screen, unexpected server shut down, OS not booting up, and performance issues.
- Coordinating with storage team for getting the LUN presented properly and also managing the local disk on windows servers.
- Configuring the ILO/DRAC on server and also troubleshooting the issues related to same.

- Configuring and troubleshooting NIC teaming on servers.
- Debugging Windows dumps using WinDBG utility
- Using tools like Process Monitor, Process Explorer to root cause Application issues
- Use Wireshark and other networking tools to isolate/root cause network issues

Citrix

- Publishing new applications on Citrix Farm.
- Granting access to users on the published applications.
- Troubleshooting the issues reported by end user like not able to launch the application, not able to print from application etc.
- Knowledge of web interface and secure gateway.
- Troubleshooting load balancing issues.

ACADEMIC BACKGROUND

Anjuman Islam Kalsekar Technical Campus – Mumbai University
Bachelor of Engineering in Electronics and Telecommunication

HOBBIES AND INTERESTS

- Riding – Bike and Car
- Watching TV and Sleeping
- Talking with Friend

CERTIFICATIONS

VMware Certified Foundation – Datacentre Virtualization 6.7
